

Dispelling Common Recycling Myths

MYTH 17: "I don't recycle because it ends up in landfill"

BUSTED! Last year Australians recycled:

- * Over 2 billion aluminium cans
- * 75.4% of our newspapers – making us the best newspaper recyclers in the world
- * 8,500 tonnes of office paper which was turned into Merino made products such as 'SAFE' toilet tissue
- * To date, we've also recycled over 3 million printer cartridges via the 'Cartridges 4 Planet Ark' program
