

Let's keep the recycling right in your building!

We've given your building's bin area a makeover to make it easier to get recycling right in your building.

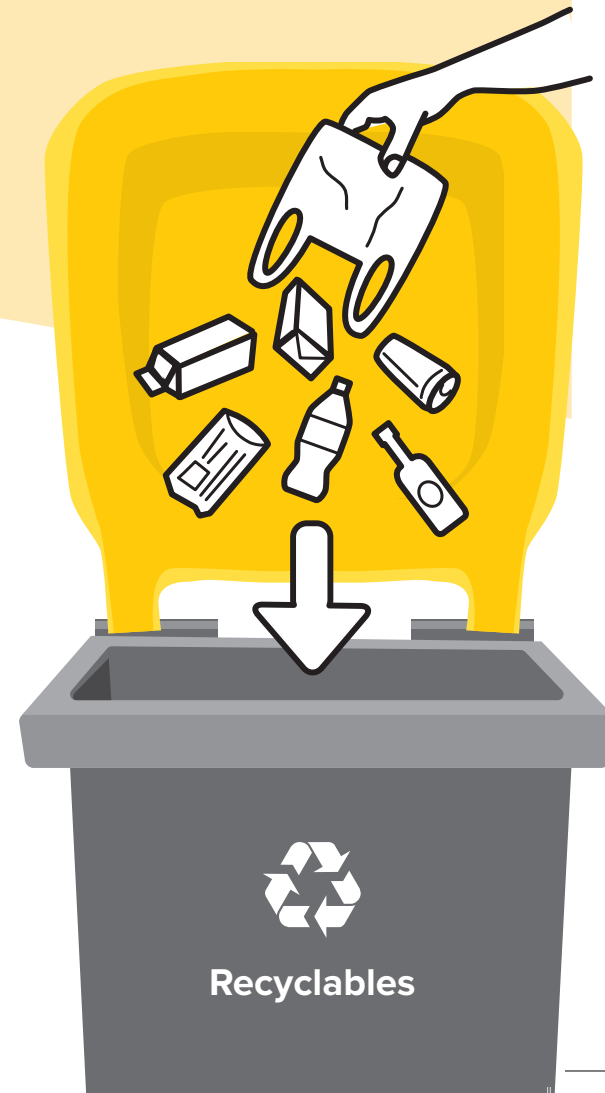

Now it's your turn! Make sure you keep bagged recycling and loose soft plastics out of your yellow-lid recycling bins.

Want to recycle your soft plastics?

If you want to recycle soft plastics, you need to collect them separately and take them to a REDcycle bin at your local supermarket store.

<Logo/s>

Remember...

Soft (scrunchable) plastics can't be recycled through your kerbside recycling bin. This includes plastic bags containing recyclable items.

When soft plastics and bagged recyclables end up at the recycling sorting factory, they have to be sent to landfill. But they can damage machines and contaminate actual recyclables on the way, wasting time, money and precious resources.

Keep soft plastics out

Did you know?

What is recyclable through your kerbside bin differs depending on what Council you're in.

Confirm what is and isn't recyclable here in <Council> by:
visiting <website>
or calling <number>.
